MARKET COMMENTARY

Global equities came out ahead after a tough month for markets. Renewed conflicts in the Middle East pushed oil prices higher and heightened concerns about inflation pressures. New US tariffs were announced but largely aligned with those the US Supreme Court recently overruled. The Nasdaq entered correction territory as positive sentiment around semiconductors and the broader AI trade lost steam. The sell-off was not confined to the US, as emerging markets fell sharply. The EM index has become highly concentrated since the start of 2025, and the very limited rotation out of the information technology sector pushed the entire index deep into the red.

Locally, the equity market was supported across sectors. Resources added value as the prices of gold, PGMs and oil rose, lifting their respective mining companies. Financials gained on the back of a weaker rand and expectations of future rate hikes. Bonds, however, lost on the same sentiment, as yields rose. The Reserve Bank kept rates unchanged in a split vote, raising concerns about the SARB's ability to manage inflation, which rose to 5.0%.

FROM THE INVESTMENT MANAGER'S DESK

The Fund's core strategic objectives:

- Medium to long-term capital growth.
- At a moderate volatility profile.
- With returns that consistently outpace inflation +4% over 3 to 5 years.

WHY CHOOSE THE FISHER DUGMORE Ci MODERATE FUND?

At Fisher Dugmore, we understand the importance of securing our client's financial future, especially when it comes to savings and retirement planning. That's why we've designed the Fisher Dugmore Ci Moderate Fund, an investment solution tailored to meet the needs of individuals seeking efficient, cost-effective, and reliable long-term growth while remaining relatively risk-averse:

Efficiency: The fund offers investors a streamlined approach to market participation, eliminating the need to manage individual securities and funds. This efficiency translates into lower costs and reduced administrative burden for our clients.

Cost Effectiveness: We prioritise cost efficiency to ensure that more of their hard-earned money stays invested, working for their future. With competitive fees and a focus on minimising expenses, the Fisher Dugmore Ci Moderate Fund aims to maximise their potential returns.

Optimised Asset Allocation: Leveraging advanced techniques and portfolio optimisation, the fund strategically allocates assets to drive returns while managing risk. Our experienced team continuously monitors and adjusts the portfolio to adapt to changing market conditions, ensuring a balanced and resilient investment strategy.

A key feature of the Fisher Dugmore range of funds is cost efficiency. The funds are designed to improve outcomes for clients and increase the benefit of compounding returns over the long term by minimising costs.

The table below shows how competitive the fund's total investment charges are in relation to the peer groups retail TIC's:

Retail TIC	Peer Rank	Percentile Rank
0.81%	5/104	4.81%

A MORE MEASURED APPROACH

The Fisher Dugmore Ci Moderate Fund may be appropriate for investors who aim to:

- Are within a 5 to 15-year timeframe from retirement.
- Require funding for medium to short-term objectives.
- Prefer a reduced risk of significant market declines.
- Have a preference for offshore assets in their retirement portfolios while adhering to regulation 28.
- Seek investment diversification.

A reminder that the Fisher Dugmore Ci Funds are CIS portfolios which are generally medium to long-term investments. Your investment decisions should always align with your financial needs and risk tolerance.

GLOSSARY SUMMARY

FAIS Conflict of Interest Disclosure

The annual service fee for the A class includes a fee of up to 0.230% payable to Fisher Dugmore, a fee up to 0.173% (Class A) or 0.115% (Class A1) payable to Ci Collective Investments and a fee of 0.230% payable to Advantage. All fees stated are inclusive of VAT. Please note that in most cases where the Financial Services Provider (FSP) is a related party to the portfolio manager, the FSP/distributor may earn additional fees other than those charged by the portfolio manager. It is the FSP's responsibility to disclose such additional fees to the investor. The Fisher Dugmore funds may obtain exposure to various asset classes by investing in another Fisher Dugmore portfolio, in which Fisher Dugmore does not earn an investment management fee.

Characteristics

This is a multi-asset medium equity portfolio which means that it may invest in a spectrum of investments in the equity, bond, money, or property markets. The portfolio tends to display average volatility and aims for medium to long term capital growth. The portfolio can have a maximum effective equity exposure (including international equity) of 60% and a maximum effective property exposure (including international property) of 25% at all times. This portfolio may, at the discretion of the portfolio manager, invest up to 45% of the assets outside of South Africa.

Risk Reward ProfileModerate

Typically, the lower the risk, the lower the potential return and the higher the risk, the higher the potential return. There is no guarantee that returns will be higher when investing in a portfolio with a higher risk profile. The risk profile for this portfolio is rated as moderate, as it may only invest up to 60% in equity securities, both locally and abroad.

RISK DEFINITIONS

Market Risk

Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment which will also affect the value of the securities held in the unit trust, thereby affecting the overall value of the unit trust.

Currency Risk / Foreign Exchange Risk

This risk is associated with investments that are denominated in foreign currencies. When the foreign currencies fluctuate against the South African Rand, the investments face currency gains or losses.

Concentration Risk

Unit Trusts pool the assets of many investors and use the proceeds to buy a portfolio of securities. There are regulations in place which limit the amount that a unit trust may invest in securities, thereby spreading the risk across securities, asset classes and companies.

Liquidity Risk

This relates to the ability of the unit trust to trade out of a security held in the portfolio at or near to its fair value. This may impact on liquidity and in the case of foreign securities, the repatriation of funds.

Credit Risk

Credit risk arises where an issuer of a non-equity security or a swap is unable to make interest payments or to repay capital. The portfolio may be exposed to credit risk on the counterparties in relation to instruments such as cash, bonds and swaps that are not traded on a recognised exchange. The possibility of the insolvency, bankruptcy or default of a counterparty with which the portfolio trades such instruments, could result in losses to the portfolio.

Inflation Risk

The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

Political Risk

The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

Tax Risk

This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which unit trusts are taxed.

Compliance Risk

This refers to the risk of not complying with the legislation, regulations, prescribed investment limits and internal policies and procedures by the manager or the portfolio manager.

DISCLAIMER

This document is not intended to address the personal circumstances of any Financial Services Provider's (FSP's) client nor is it a risk analysis or examination of any client's financial needs. Collective Investment Schemes in Securities ("CIS") are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to this portfolio and are subject to different fees and charges. A schedule of fees and charges is available on request from Ci. Ci does not provide any guarantee either with respect to the capital or the return of the portfolio. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. International investments may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. The portfolio may be closed from time to time in order to manage it more efficiently in accordance with its mandate. The Fisher Dugmore portfolios are portfolios established and administered by Ci, and Fisher Dugmore Securities has been appointed to manage and market the portfolios. Fisher Dugmore is an indirect shareholder of Ci. As an indirect shareholder, Fisher Dugmore may earn dividends from time to time and participation in any dividends may be linked to the revenue generated by Ci from the Fisher Dugmore portfolios, and from any other Ci portfolios. Ci retains full legal responsibility for this co-named portfolio. Additional information on the portfolio may be obtained, free of charge, directly from Ci. Ci is a Non-Voting (Ordinary) Member of the Association for Savings & Investment SA (ASISA). The one-year Total Expense Ratios are 0.80% for class A, 0.74% for class A1 calculated over a 12-month period to 30 Jun 2025, Ci's last financial year end. Total Expense Ratio (TER): The above TER % has been annualised and indicates the percentage of the value of the portfolio which was incurred as expenses relating to the administration of the portfolio over the rolling 3 year period or since fund inception, on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER's cannot be regarded as an indication of future TER's. Transaction Cost (TC): The above TC % has been annualised and indicates the percentage of the value of the portfolio which was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction Costs are a necessary cost in administering the portfolio and impacts portfolio returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of portfolio, investment decisions of the investment manager and the TER. Total Investment Charge (TIC) is the TER plus TC which indicates the percentage of the value of the portfolio which was incurred as costs relating to the investment of the portfolio. A FX fee of up to 0.05% (incl. VAT) on any FX transactions may be payable to Fisher Dugmore in addition to the annual fees referred to above. An execution fee of up to 0.04% (incl. VAT) on any swap transactions may be payable to Fisher Dugmore in addition to the annual fees referred to above. Performance quoted is for lump sum investment with income distributions, prior to deduction of applicable taxes, included. NAV to NAV figures have been used. The annualised return is the return of the performance period re-scaled to a period of one year. Performance is calculated for the portfolio and individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax.
